

Innospec is a global supplier of specialty chemicals covering Europe, Asia, and United States with the main aim to provide innovative solutions to our customers in a responsible, resource-sensitive and environmentally-friendly manner, and with a constant focus on quality-oriented service. We have a strong portfolio of additives and technically advanced solutions for use in the Construction industry. From the production of plasterboard, on-site plaster and mortar applications (drymix), the formulation of concrete admixture and tunneling, we have the products to improve efficiency, performance and provide significant benefits to each of these applications. We provide a complete range that can support the manufacturers of Building and Construction products and we want to provide the end-consumers with a choice of options for achieving a desired result.
